Subject Submission of Responses to EPA, Revised Test Plan and Revised Robust Summaries for FD&C Red No. 40 by IACM

Dear Administrator:

On behalf of the member companies of the International Color Manufacturers Association (IACM), I am pleased to submit a letter responding to the EPA comments on the FD & C Red No 40 (**CAS No. 25956-17-6**). We also wish to submit a revised test plan and revised robust summaries for this chemical. Additional ecotoxicity data and revised environmental fate data have been included in these revisions. These documents represent the final submission by IACM for this chemical. The cooperation of IACM with EPA has lead to the accumulation of relevant hazard data and provided many benefits both to the industry and the public. Our Association values the experience.

Respectfully,

Timothy B. Adams, Ph.D.
